## EDUCATION

---

### Korea Advanced Institute of Science and Technology (KAIST)

Graduate School of AI

Daejeon, Korea

Mar. 2021 - Feb. 2023 (Expected)

#### *M.S. in Artificial Intelligence (Expected)*

- Supervisor: **Juho Lee** — Statistical Inference and Machine Learning Lab (SIML)
- Thesis: *Traversing Between Modes in Function Space for Fast Ensembling*
- Research interests: Loss landscape, Neural processes
- GPA: 4.08 / 4.3

### SungKyunKwan University (SKKU)

Department of Computer Science and Engineering, College of Computing

Seoul, Korea

Mar. 2017 - Aug. 2020

#### *B.S. in Computer Science and Engineering*

- Total GPA: 4.33 / 4.5
- Major GPA: 4.47 / 4.5

## EXPERIENCE

---

### Artificial Intelligence Institute of Seoul National University (AIIS)

Deep Representation Learning Research Group (DRL)

Seoul, Korea

Jun. 2020 - Sep. 2020

#### *Research Intern*

- Supervisor: **Wonjong Rhee**
- Research on model interpretability and activation on-off patterns.
- Reproduce CNN visualization methods, including Grad-CAM, (C)LRP, etc.

### Electronics and Telecommunications Research Institute (ETRI)

Artificial Intelligence Research Laboratory

Daejeon, Korea

Jan. 2020 - Feb. 2020

#### *Research Intern*

- Supervisor: **Yoo-mi Park**
- Test and debug ETRI Deep Learning HPC Platform Dashboard.
- Implement AlexNet and ResNet models with DL-MDL to serve as example deep learning models.

## AWARDS & HONORS

---

### The National Scholarship for Science and Engineering

Spring 2019 - Spring 2020

Korea Student Aid Foundation (KOSAF)

- Supports undergraduates with strong academic performance in science and engineering.

### SungKyun Software Scholarship

Spring 2017 - Fall 2018

SungKyunKwan University (SKKU)

- Supports students with an outstanding GPA.

### Dean's List Award

Spring 2017 - Fall 2019

College of Computing, SungKyunKwan University (SKKU)

- In recognition of high scholastic achievement. (6 times)

## PUBLICATIONS

---

### CONFERENCE

#### Scale Mixtures of Neural Network Gaussian Processes

Hyungi Lee, **Eunggu Yun**, Hongseok Yang, Juho Lee

ICLR

2022

### JOURNAL

#### Benefits of stochastic weight averaging in developing neural network radiation scheme for numerical weather prediction

Hwan-Jin Song, Soonyoung Roh, Juho Lee, Giung Nam, **Eunggu Yun**, Jongmin Yoon, Park Sa Kim

JAMES

2022

## PROJECTS

---

#### Bayesian inference for time-series data with missing values

*Aug. 2022 - Feb. 2023*

Samsung Research

- Developing a Bayesian deep learning method that can quantify uncertainty within missing values.
- Propose multivariate time-series classification model using a regularization method called ObsDropout.
- Validate proposed method on PhysioNet 2012, MIMIC-III, and UCI human activity datasets.

#### Developing artificial intelligence based emulator for physics processes in numerical models

*May 2021 - July 2022*

National Institute of Meteorological Sciences (NIMS)

- Research on the developing alternative techniques of physical processes in the numerical weather prediction (NWP) model based on AI to reduce computational costs and to improve the accuracy of NWP.

## SKILLS

---

|                      |  |
|----------------------|--|
| <b>Programming</b>   | Python, JavaScript, C, C++, LaTeX                                  |
| <b>Deep Learning</b> | PyTorch (+ PyTorch/XLA), JAX (+ Flax, Optax), TensorFlow (+ Keras) |
| <b>System</b>        | Linux, Docker, Google Cloud Platform (+ TPU)                       |
| <b>Languages</b>     | Korean (native), English (intermediate)                            |
